

nullCarbon LCA Exporter: Installation & User Guide for Revit

This comprehensive guide walks you through every step of installing the nullCarbon plugin for Revit and using its LCA Exporter tool. From downloading and installing the plugin to exporting schedules with the necessary quantities for your life cycle reports, this guide ensures a seamless integration process and optimal performance in your projects. Whether you are setting up the tool for the first time or looking to refine your workflow, this guide provides clear instructions and helpful visuals to support you every step of the way.

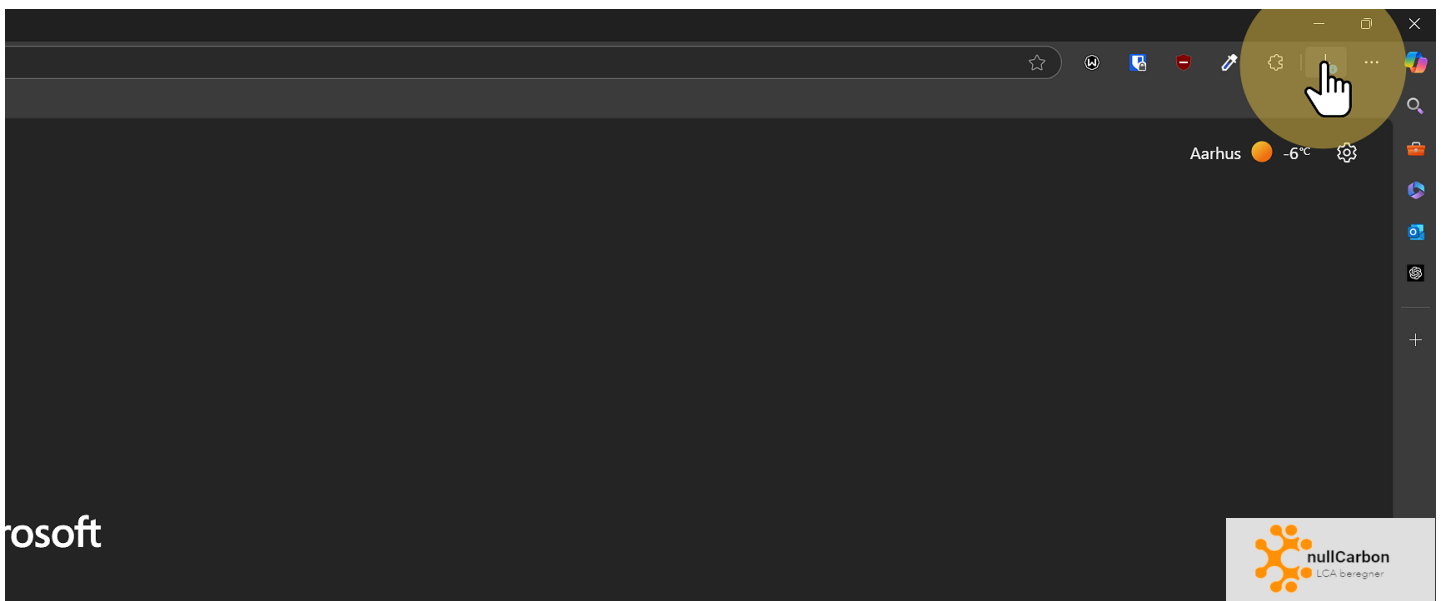

1 Close Revit

Before beginning the installation, ensure that Revit is completely closed.

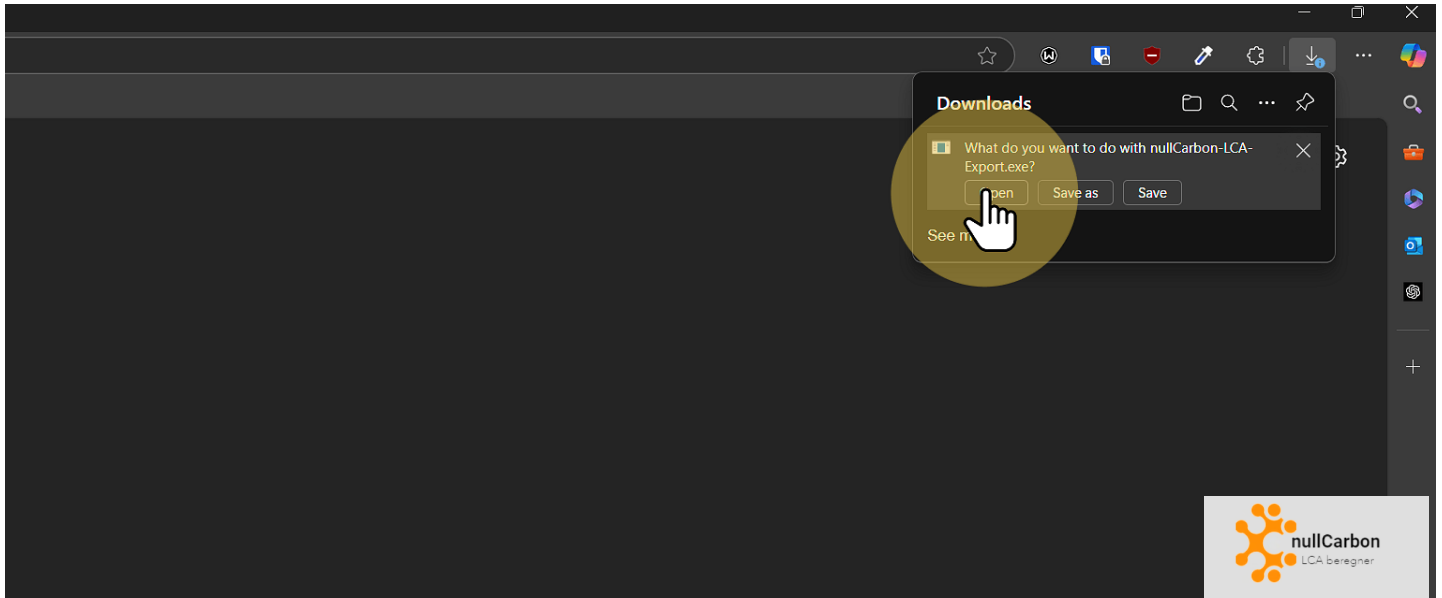

2 Download the Installer

- Visit the nullCarbon website and click the **Download** button.
- In your browser, click the **Download** button again to start the download.

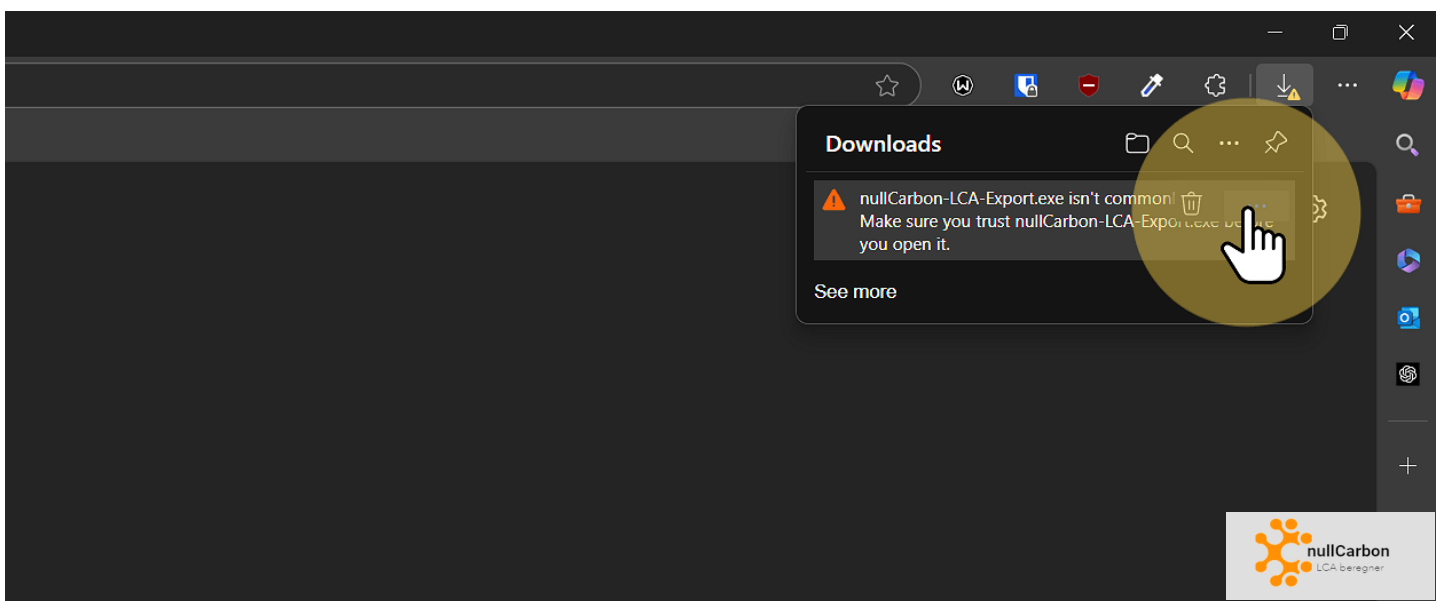

3 Open the Downloaded File

once the download is complete, click **Open**

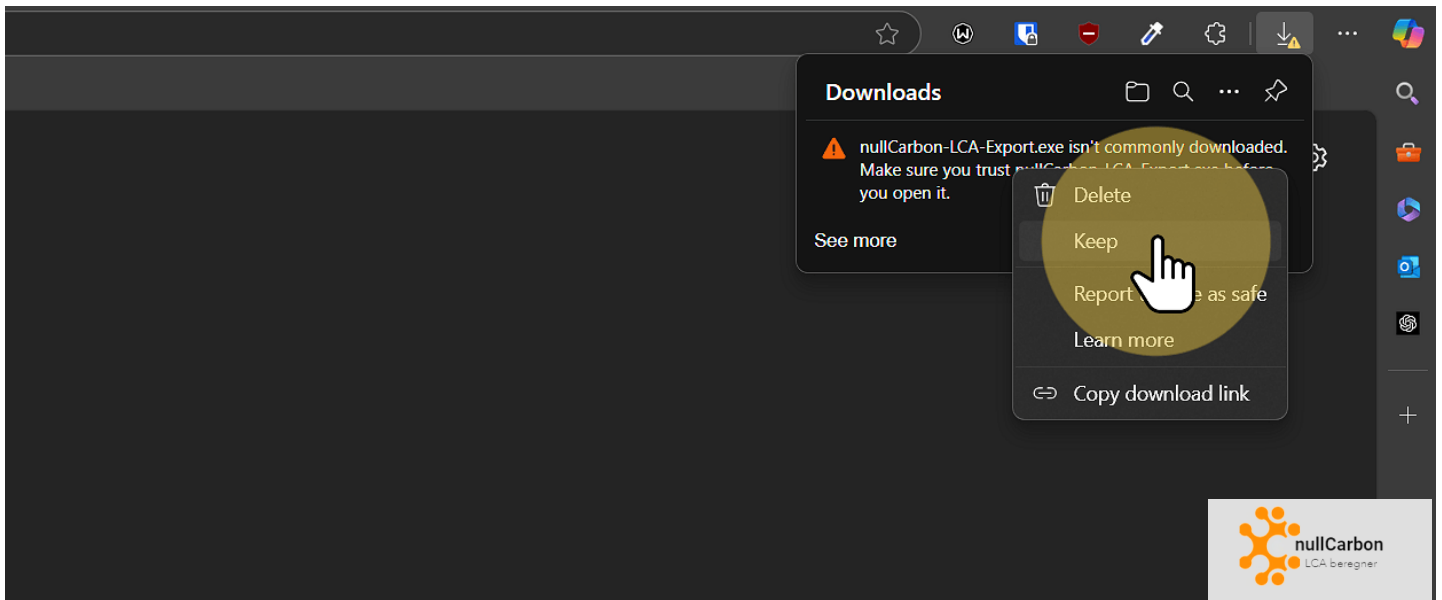

4 Browser Security Warning

If your browser displays a warning (e.g., “Make sure to trust the program”), click the menu bar (typically represented by three dots or a similar icon).

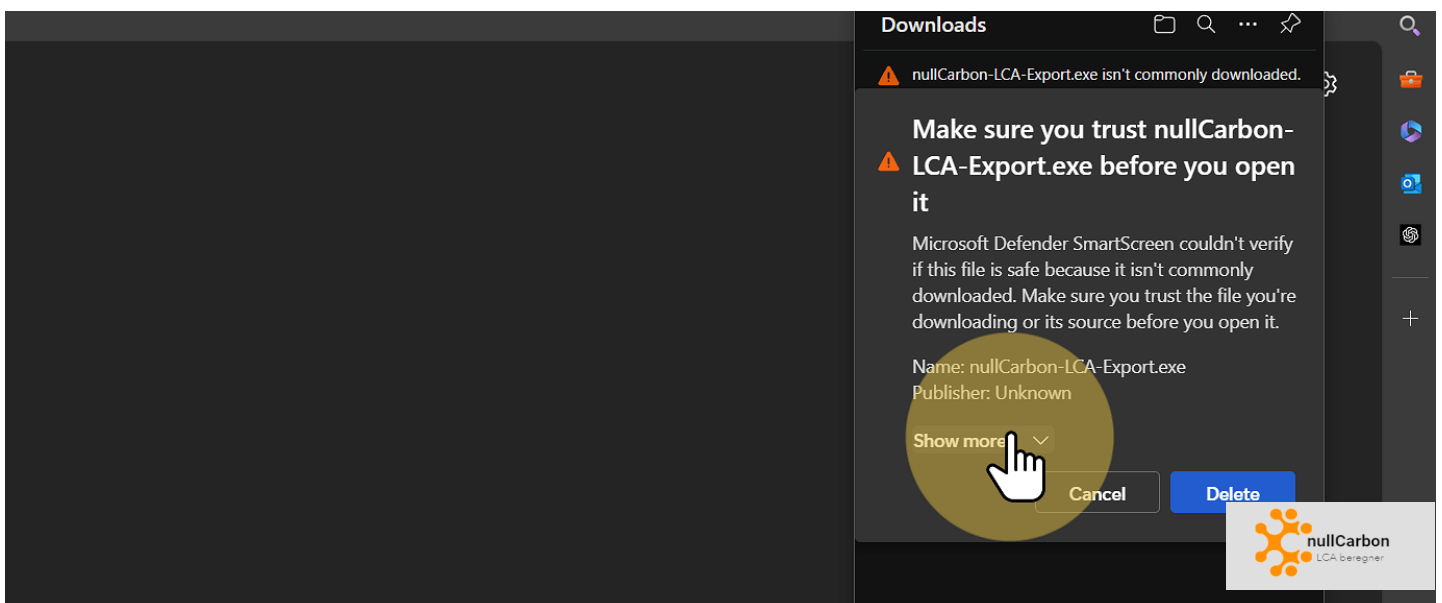

5 Click Keep

From the menu, select **Keep** to proceed.

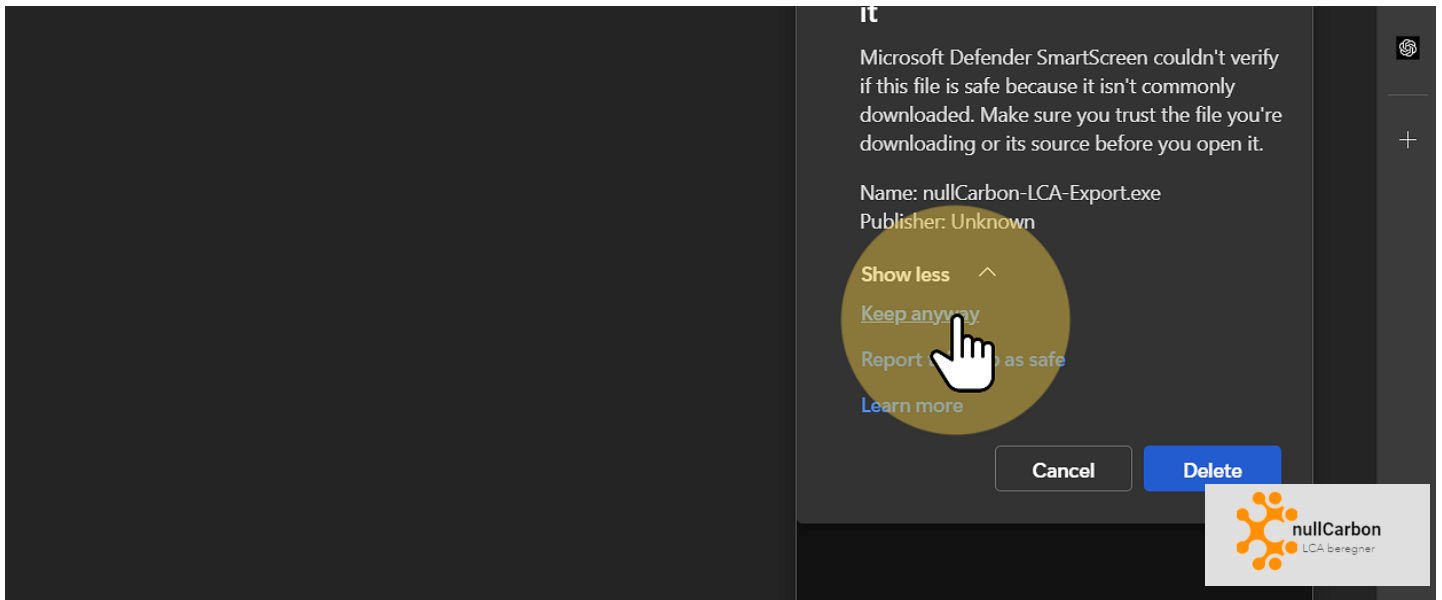

6 Additional Warning

If another warning appears, click **Show More**

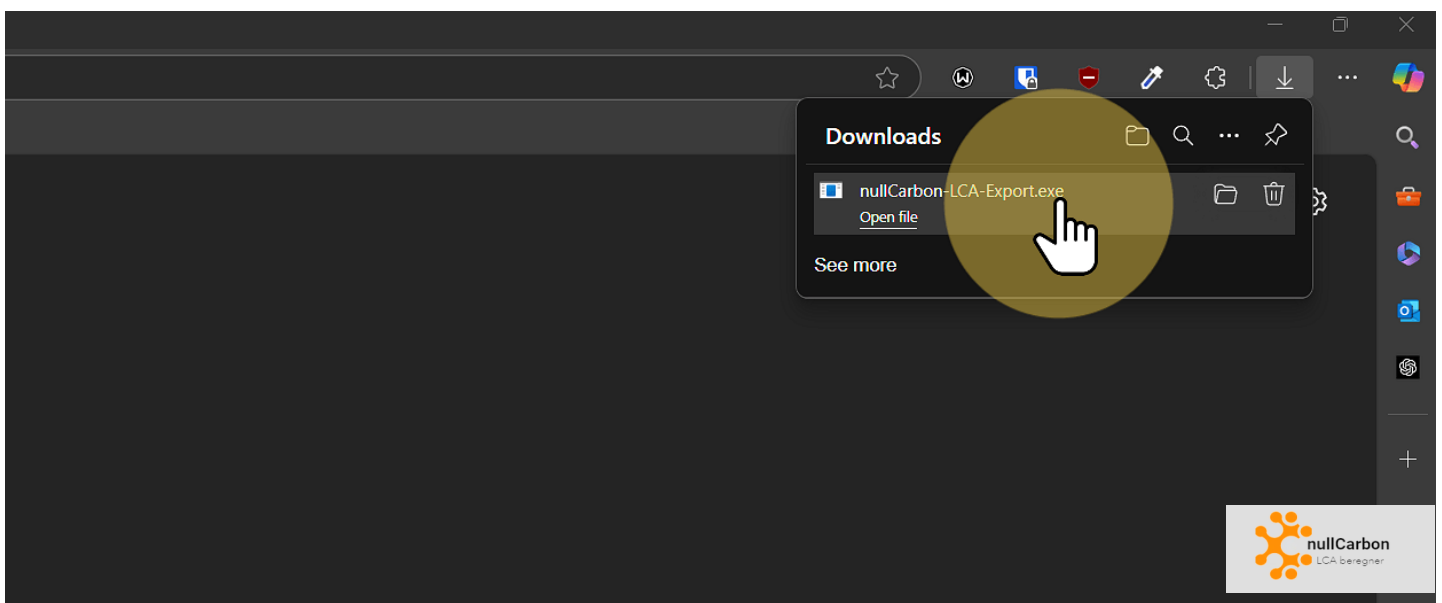

7 Confirm Trust

Click **Keep Anyway** to confirm and continue the installation

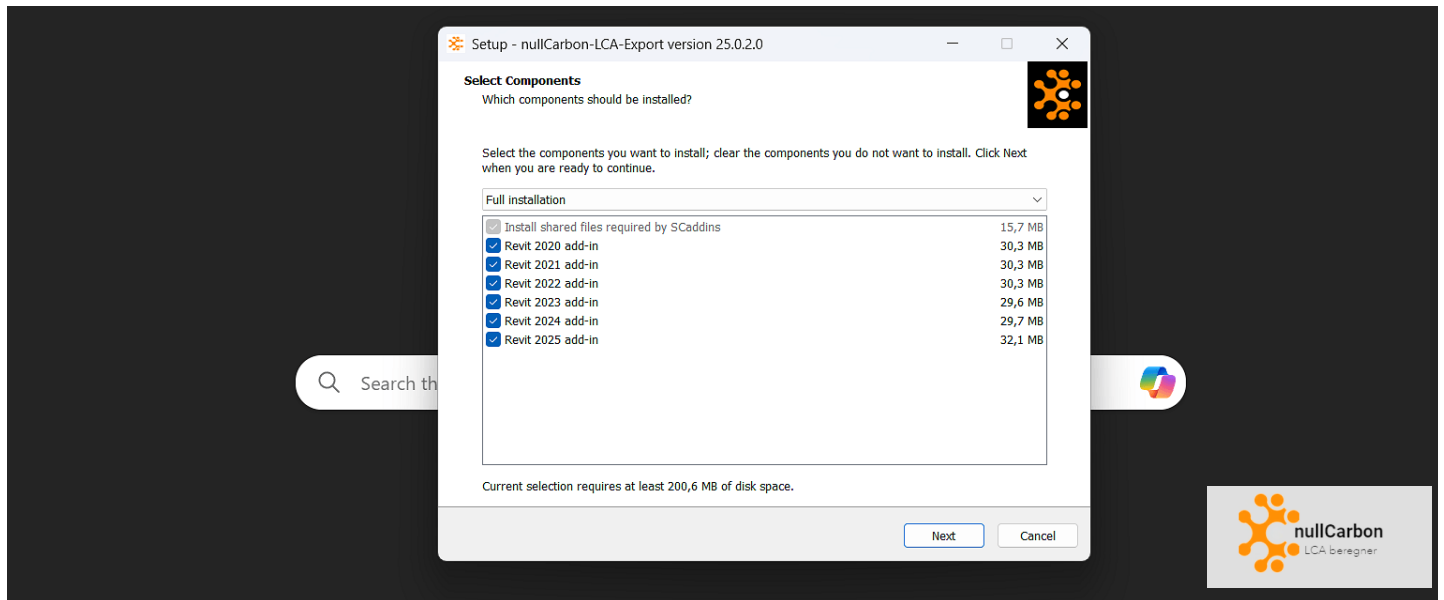

8 Launch the Installer

Click the downloaded file to start installing the plugin.

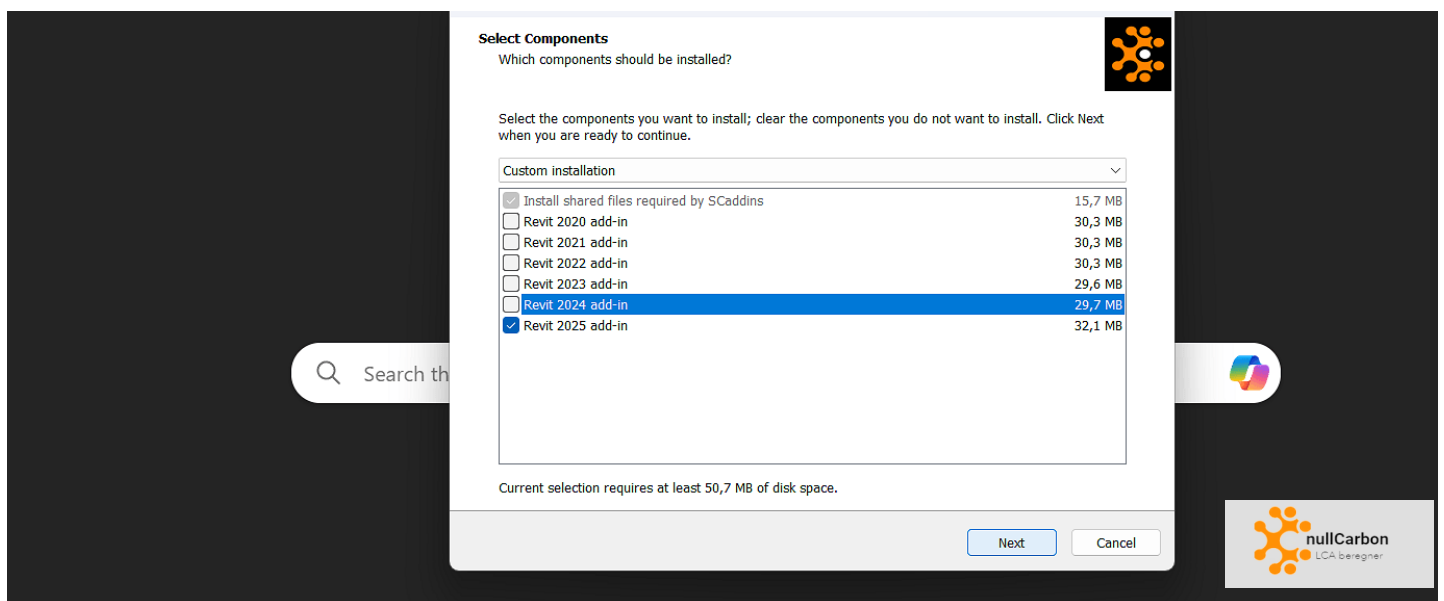

9 Select Your Revit Version

In the installer, select the version of Revit you are using.

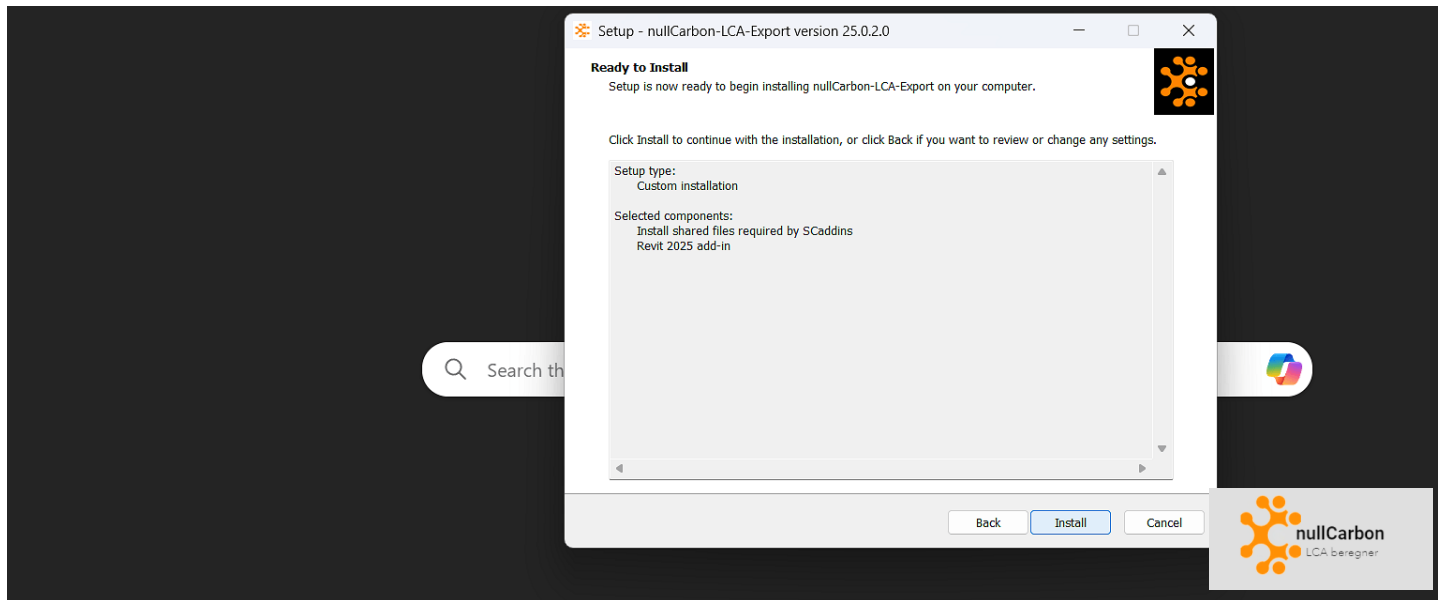

10 Proceed to the Next Step

Click **Next** to continue.

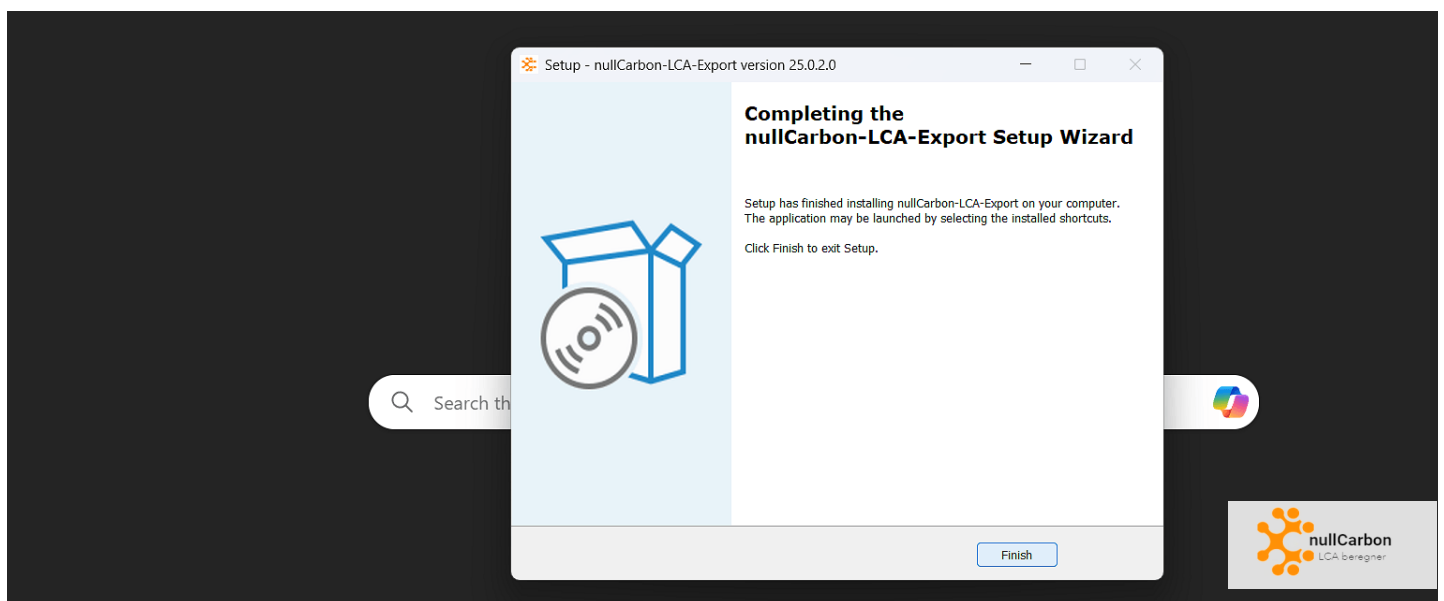

11 Install the Plugin

Click **Install** to begin the installation process.

12 Complete Installation

After the installation is complete, click **Finish**. You can now reopen Revit.

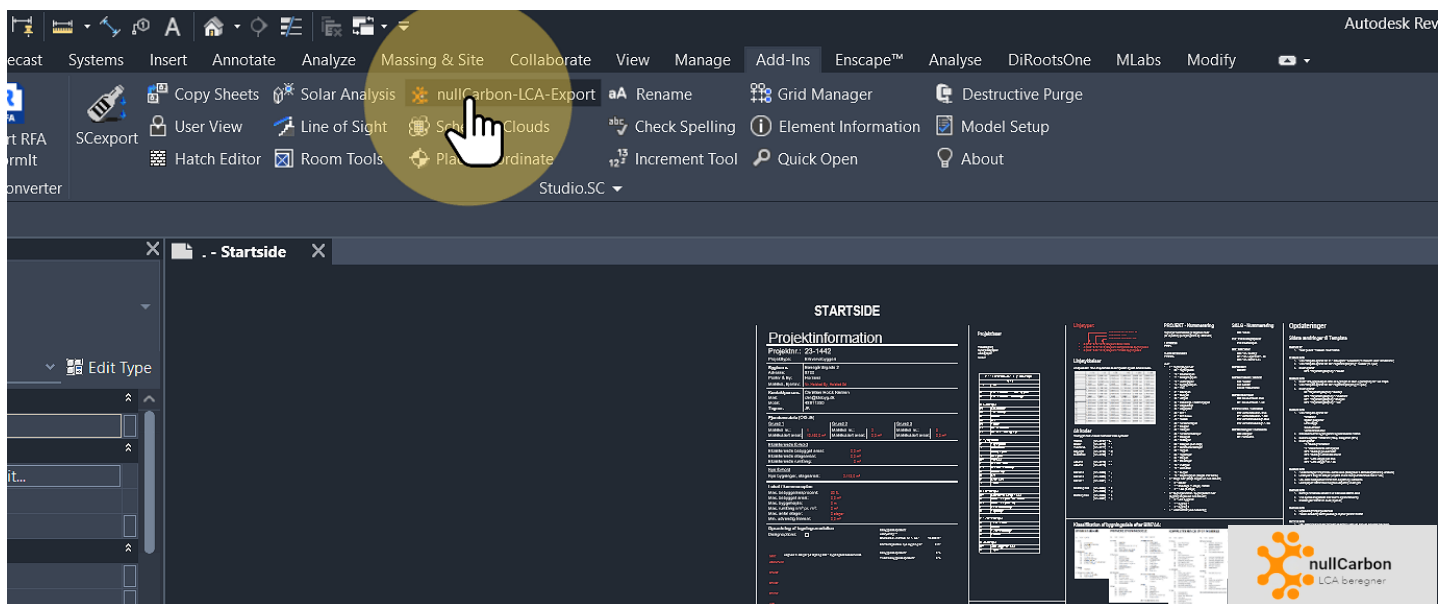

13 Open the Add-Ins tab

After reopening Revit, navigate to the **Add-Ins** tab

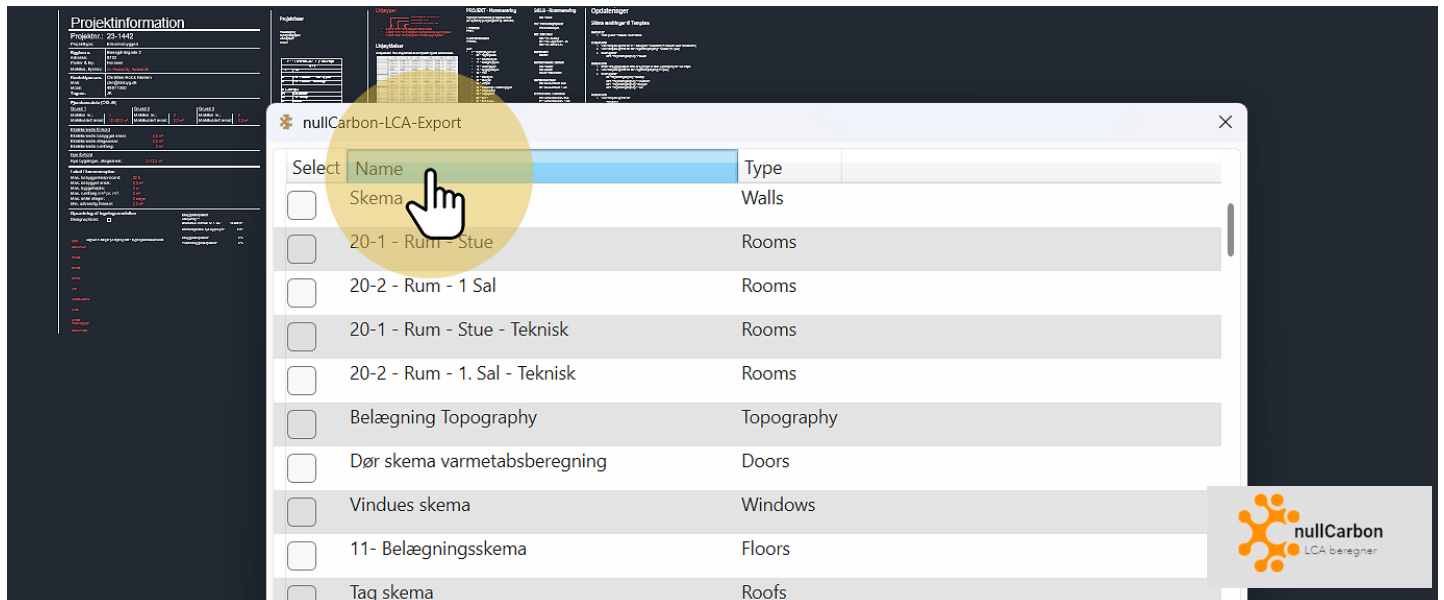

14 Open the nullCarbon LCA Exporter

click on **nullCarbon-LCA-Exporter** to open the plugin.

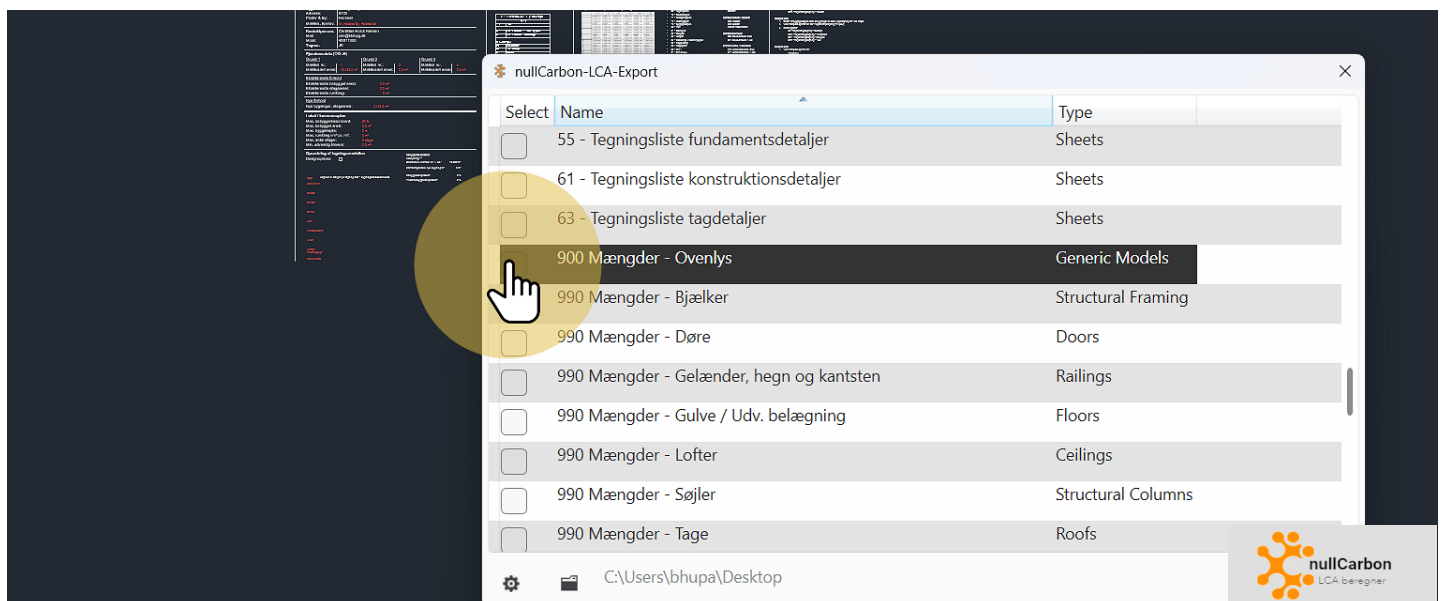

15 (Optional) Short Schedule Names

With the exporter open, you can click on the schedule name field to short your schedules by name.

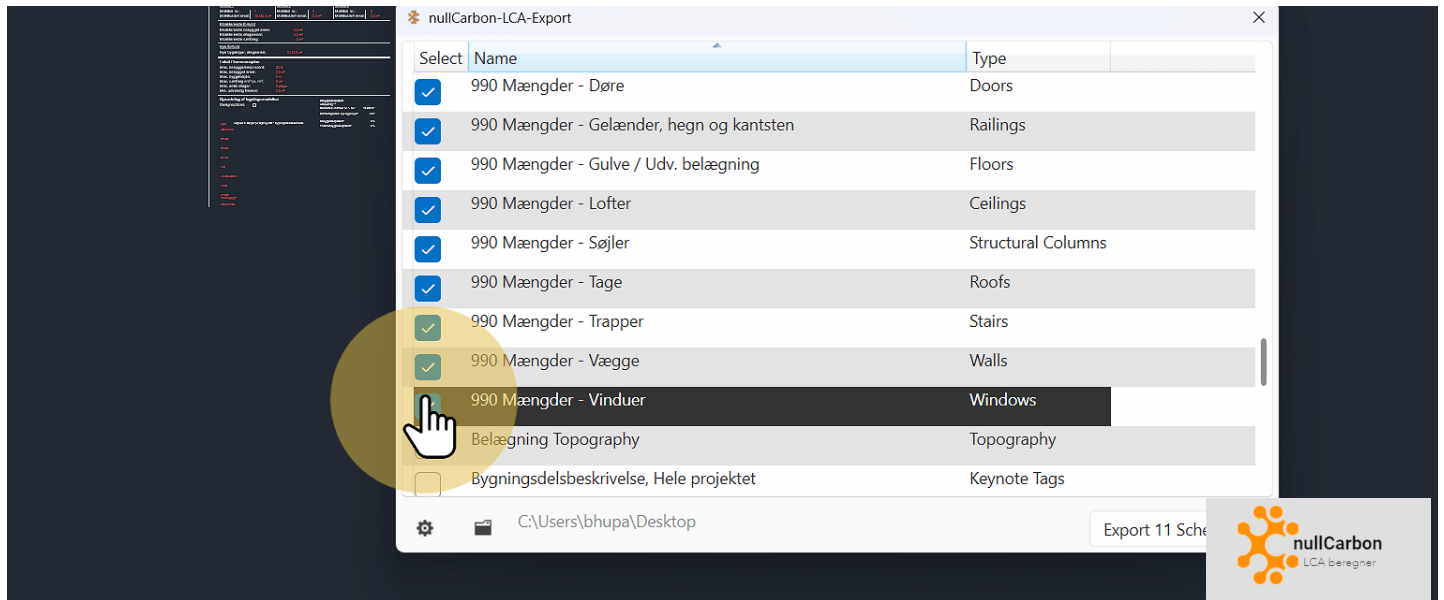

16 Select Schedules with Quantities

Ensure you select all schedules that include quantities (mængder).

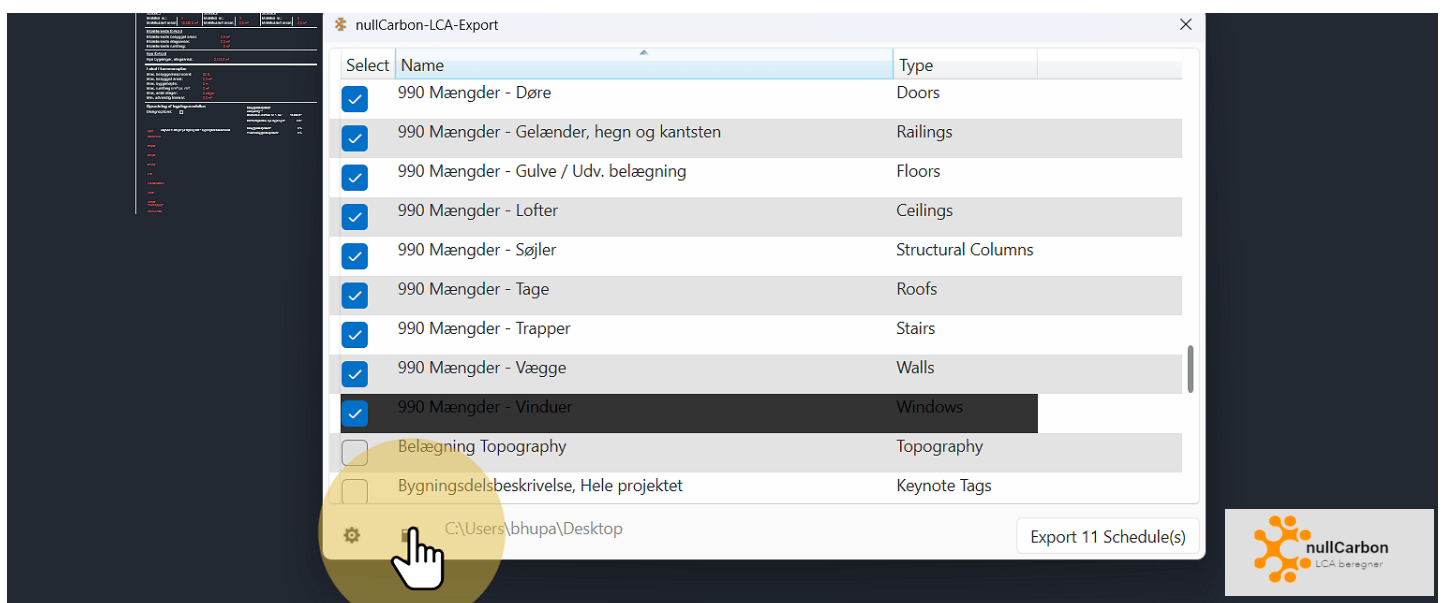

17 Select all schedules

These quantities are essential for generating the life cycle report.

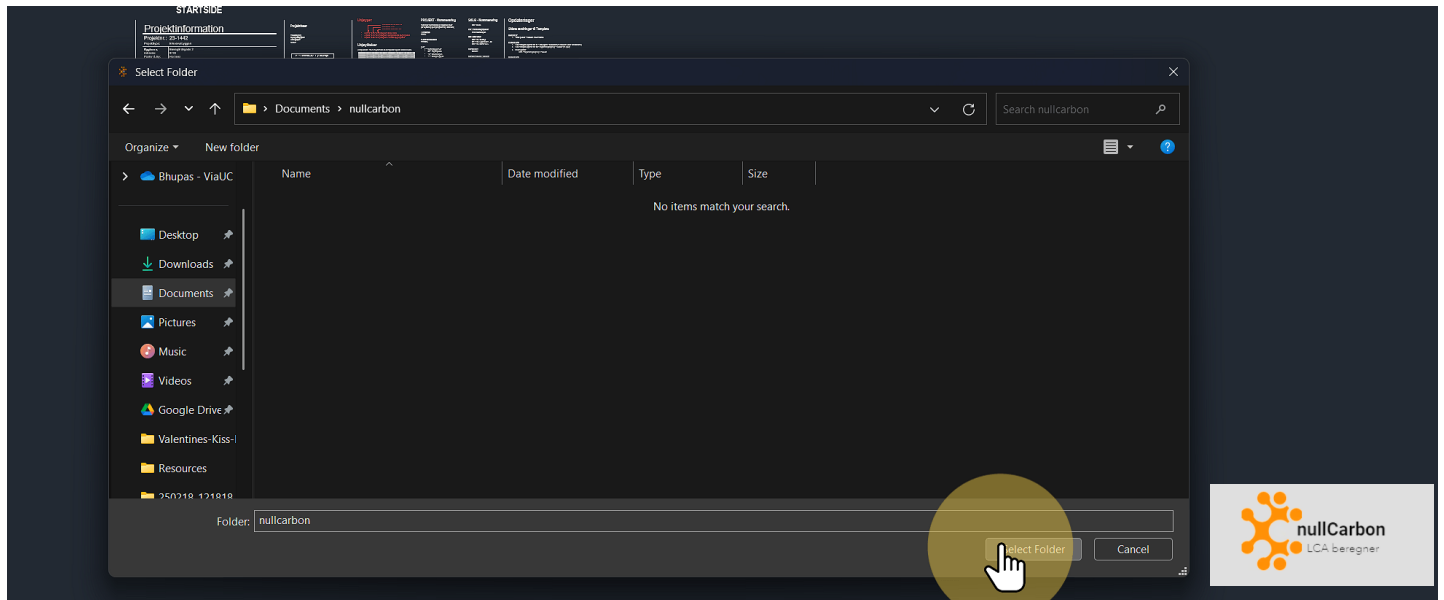

18 Choose the Save Location

Click the folder icon to select the folder where you want the file to be saved. By default, the file is set to save on the Desktop.

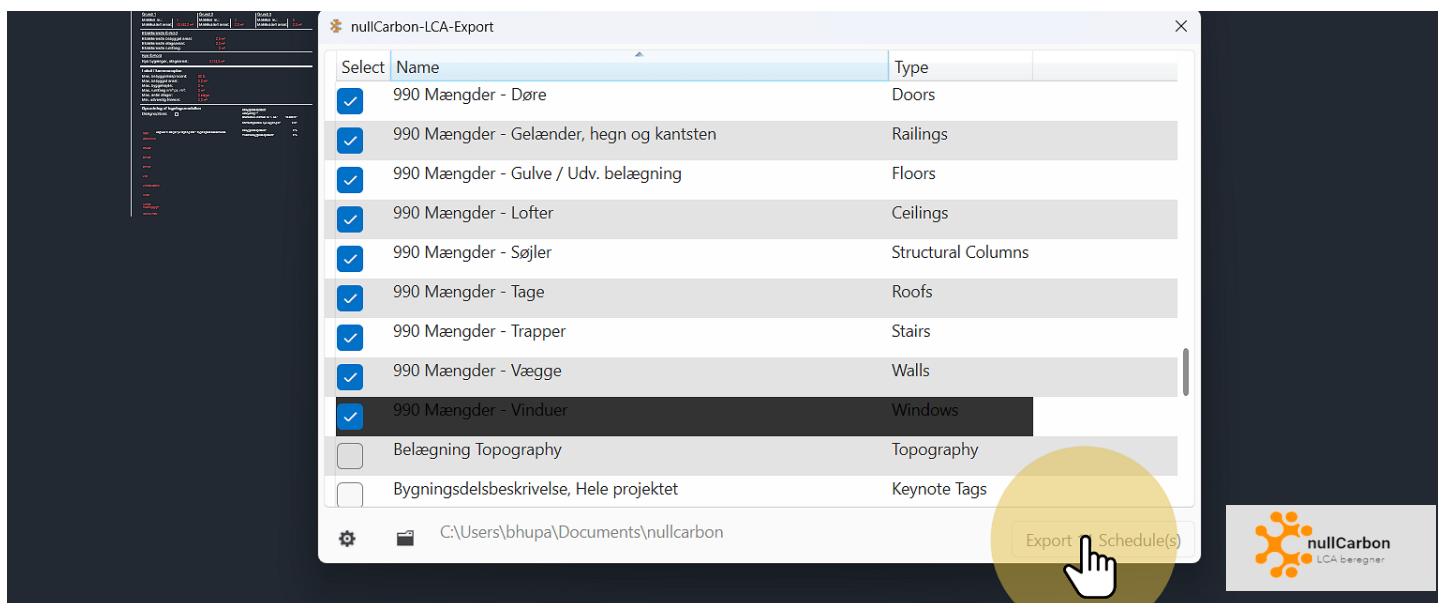

19 Confirm Folder Selection

Browse and select the desired folder, then confirm your selection.

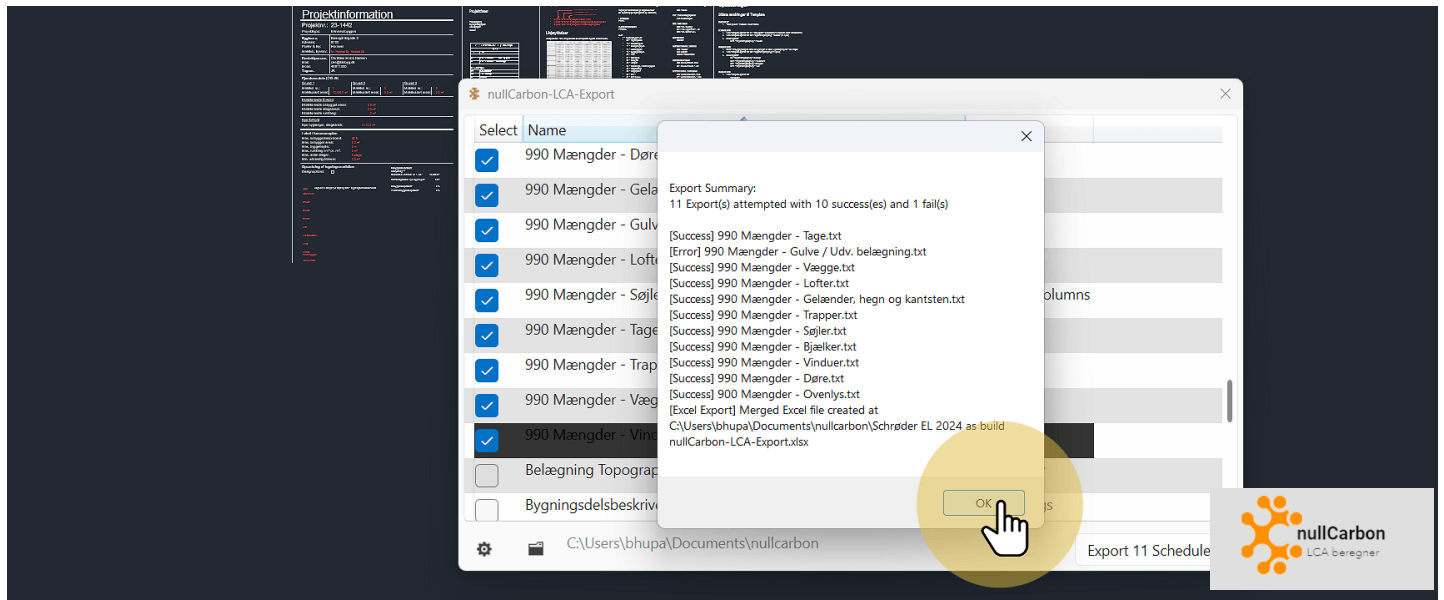

20 Export the Schedules

Click the **Export Schedules** button to generate the export file.

21 Complete the Export Process

A pop-up window displaying the export summary will appear. Click **OK** to close the pop-up.

22 Upload the File

Your file has now been saved. You can upload this file into our application for further processing.
